

KANANELO MOLOI

Junior Software Developer | AI & Automation | C# / .NET | React | Python
Phuthaditjhaba, Free State, South Africa | 078 330 6898 | moloimartin8@gmail.com | github.com/KananeloMoloi

PROFESSIONAL SUMMARY

Junior Software Developer with a National Diploma in IT (Software Development) and practical experience building web applications, backend functionality and AI-driven software projects. Experienced with C#, ASP.NET Core, .NET, Entity Framework Core, SQL Server, React, JavaScript and Python. Contributed to a live organizational website alongside other interns and developed patient management functionality for a medical management system. Currently an Intern at CAPACITI, undertaking an AI-focused bootcamp and building practical AI knowledge through structured learning and independent projects. Interested in software engineering, AI agents, automation, backend development and intelligent applications.

TECHNICAL SKILLS

Languages	C#, Python, JavaScript, TypeScript, HTML5, CSS
Backend	ASP.NET Core, .NET, MVC, Node.js, API Integration
Frontend	React, React Router, Vite, Tailwind CSS, React-Bootstrap
Database	SQL Server, MySQL, Entity Framework Core
AI & Automation	AI Agents, Ollama, Qwen3, Local AI, Task Automation
Authentication	ASP.NET Identity, Role-Based Access
Development	Object-Oriented Programming, Web Application Development, Git, GitHub
Other	IoT, Cloud Computing, Cybersecurity, Digital Literacy

PROFESSIONAL EXPERIENCE

CAPACITI

Sep 2026 – Present

Intern, AI & Software Development

- Participate in an AI-focused bootcamp, building practical AI knowledge through training and hands-on activities.
- Supplement bootcamp learning with AI-focused courses on Coursera, exploring AI for software development, automation and intelligent applications.
- Develop independent AI projects to strengthen understanding of AI agents and automation, while continuing software development.

CumLaude Research Institute

Mar 2026 – Aug 2026

Intern Developer

- Collaborated with 4 other interns to develop and maintain a live organizational website.
- Implemented functionality and improvements, applying software development skills to real-world requirements.
- Developed an early-stage internal work dashboard concept; facilitated IoT and Cloud Computing.

Free State Smart Skills Centre

Feb 2026

Information Technology Facilitator

- Facilitated IT training through Cisco Networking Academy, supporting Cybersecurity and Digital Literacy learning.
- Assisted learners with practical activities and communicated technical concepts to different levels of IT experience.

SELECTED PROJECTS

A.E.G.I.S. — Multi-Agent AI Assistant (in active development)

Python | Ollama | Qwen3 | AI Agents | Automation

- Developing a local AI assistant that interprets user requests and routes them to specialized agents.
- Integrated the Ollama local API with a Python backend to run an AI model locally.
- Implemented Agent Manager routing between Chat and Research agents, with a reusable base Agent class for extensibility.
- Added a command-line interface for interacting with the assistant, exploring local task automation.

GitHub Repo: [A.E.G.I.S.](#)

Medical Management System (team project)

C# | ASP.NET Core MVC | .NET 9 | EF Core | SQL Server | ASP.NET Identity

- Developed patient management functionality, including record search, filtering, sorting and status management.
- Worked with backend controllers and HTTP endpoints for CRUD and data management.
- Used Entity Framework Core for queries and persistence across patients, doctors, visits, prescriptions, medications and wards.
- Applied ASP.NET Identity and role-based user management within an MVC architecture.

GitHub Repo: [Medical System](#)

Giftly Haven — E-Commerce Web Application (AI Project)

React | TypeScript | Vite | Tailwind CSS | React Router | React Query

- Built a responsive gift-shopping app with reusable components, product browsing and category filtering.
- Managed cart state with React Context; developed pages for products, authentication, administration and customers.
- Used Radix UI, React Query, React Hook Form and Zod for interface structure, data fetching and validation.

GitHub Repo: [Giftly-haven](#)

CumLaude Institute — Website (team Project)

HTML | CSS | JS

- Collaborated with 4 other interns to develop and maintain the organisation's live website.
- Contributed to the design, development and implementation of website functionality and content.
- Worked as part of a development team to build and maintain a production website used to present the organisation's services and programmes.
- Applied frontend development and web development practices to real-world business requirements.
- Developed an early-stage internal work dashboard concept.

EDUCATION

Nelson Mandela University <i>National Diploma in IT — Software Development</i>	2023 – 2025
Nelson Mandela University <i>Higher Certificate in IT — User Support</i>	2022
Kgola-Thuto Secondary School <i>National Senior Certificate</i>	2021

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- CCNA: Introduction to Networks (2023)
- Introduction to Cybersecurity (2023)
- Advanced Secure Technologies (2022)

CORE STRENGTHS

Software Development • Problem Solving • Critical Thinking • Team Collaboration • Technical Communication • Adaptability • Continuous Learning • Leadership

LANGUAGES

English • Sesotho • Zulu • Pedi • Tswana
